

Special Topics Program

Focused depth on set of related topics, strengthening understanding and problem-solving ability.

Who Is It Meant For

- Know the basic concepts and formulas of the topic but cannot solve problems confidently or consistently
- Students of Class 11, Class 12, or droppers who have studied the topic at least once
- Preparing for JEE Mains, JEE Advanced, ISI, CMI, or any competitive mathematics examination

Program Structure

- 1 month · 3 sessions per week · 90 minutes per session via Zoom
- Online, interactive sessions in batches of 10 students of roughly similar level
- After every session, 5 diagnostic problems given for HW -- tough, testing ability to apply concepts and solve problems of that topic
- Submitted work manually reviewed for corrections on approach and thinking sent via Telegram
- 60 problems on the topic given at end of program to test real improvement
- Doubts on any problem resolved via Telegram during and after the program
- Upcoming topics and batch schedules announced on the Telegram channel

What You Will Learn

- Build deep understanding of the topic beyond formulas and standard results
- Solve any problem type within the topic with confidence
- Recognise the core ideas and structures that appear repeatedly across questions
- Apply the same thinking flexibly across all question types within the topic

All teaching and practice done through problems from JEE Mains to Advanced level, specific to the topic covered in that batch.

Program fee

Rs. 10,000/-

Open to all students who have studied the topic at least once.
